VIC 1907

# JUPITER LANDER

## Loading the Cartridge and Starting the Game.

1. Turn your VIC-20 OFF before inserting or removing the cartridge.
2. Insert the cartridge (label side up) into the wide expansion port on the back of the computer.
3. Turn the VIC-20 ON. After a second or two, the opening title should appear on the screen. (If the title doesn't appear, turn your VIC-20 off then back on).

## Adjusting Screen Position

To center the picture use the  and  keys. Each time you press the  key, the picture will move to the right, and when the  key is pressed, the picture will move towards the bottom of your TV screen. Keep using these two keys until you are satisfied the picture is centered within your screen. (NOTE: Once the game has begun you can not change the screen colors).

## Eliminating Screen Flutter

On some TV sets with automatic fine tuning your screen may "flutter" up and down when using a computer or video game. To correct this, hold down the  key and hit the  key. (NOTE: Doing this with a standard TV set may cause the screen to flutter).

## STRATEGY

Land your spaceship safely on the only solid landing site on Jupiter. Make as many exploratory landings as possible before fuel runs out. There are only 3 landing sites with 3 exciting difficulty levels. You can control the thrust level of play.

## CONTROLS

JUPITER LANDER can only be played with your keyboard.

A Key .....	Left Thrust
D Key .....	Right Thrust
F1 Key .....	Heavy Thrust
F2 Key .....	Middle Thrust
F3 Key .....	Low Thrust

## SCORING

The softness of the landing site is displayed on the meters-per-second gauge on the right side of the screen. If you land below the yellow zone — you crash. The softer the landing area . . . the more points you get. Try to land with the marker high in the yellow zone.
